## Oorja Releases New T-1 Methanol Fuel Cell System

MI member **Oorja Protonics, Inc.**, a global leader in liquid fuel cell technologies, has announced a new product, the Oorja Model T-1 methanol fuel cell system.

The T-1 is a methanol fuel cell system that provides back-up power, or the main source of power, for a variety of applications, mostly stationary, such as cellular towers, oil and gas pipeline-monitoring and valve control, and military communications.

The T-1 methanol fuel cell system provides 1.1 kW of net power at 24V or 48V, and operates with an external fuel tank that can vary in size depending on customer requirements. More information is available [HERE](#).
